---About the translation project---

The translation of this game started by Dgrin and Makein's teams, using the basis of jjjewel's team project, porting the 28% of the game's scripts to continue from there and develop a full translation at the time. The project had a lot of support and even some tools were developed to allow decryption of the .img archives. However, the lack of proper resources to decrypt, repack, and make some files work properly stalled the project. Also, a lack of interested parties to continue translating the project made it impossible to continue with the endeavor.

Further down the line, around June of 2020, K7ra (known as Θάλης in Discord) restarted the project using the tools at hand; with the creation of a Discord server dedicated for the translation efforts, having the objective of releasing a playable patch for people to enjoy.

---Instructions---

Note 1: These instructions were taken from the GitHub of the former translation project.

Note 2: We encourage you do a dry run of the game without the translation installed, that way you can name your character to your liking without being broken with the translation, until further notice.

➤ For LUMA:

Create a folder named 'titles' inside 'luma'.

Create a folder with '00040000000F4E00' as the name inside 'titles'.

Create a file named 'locale.txt' in the '00040000000F4E00'.

Open the file and type in 'JPN JP', save it.

Create a folder called 'romfs' in '00040000000F4E00'.

Extract the .zip and read the instructions inside, then put the 'NLPPATCH' folders in the '00040000000F4E00/romfs' folder at the correct locations as they appear in the original game:

<https://github.com/LovePlusProject/NLPPATCH/releases>

To obtain "000f4e00.code" (a modded code.bin file) download the '[NLP+].Hans.code_plugin':
https://mega.nz/#!M5RSBLzD!ibD9P7_vNHFCfD_1sAaYsUEAz5mnN-4e9tRBf9Bss0.

Rename '000f4e00.code' to 'code.bin' and put it in the '00040000000F4E00' folder.

Don't forget to turn on the "Enable game patching" option which is off by default at the LUMA3DS menu (press SELECT when powering on your 3DS), if you need further assistance for this method, these are the original LUMA3DS options:

<https://github.com/AuroraWright/Luma3DS/wiki/Optional-features>

When Updating

When updating the patch, just follow the instructions inside the .rar archive. For short, just drag and drop the scripts and whatever else is there, inside your luma/ Citra folder. When a window asks you if you want to overwrite, just select "Yes".

Make sure you don't misplace the archives, so double check after verifying the date of modification. Also, remember to check on the GitHub once in a while, or visit the project's Discord to get the latest updates.

➤ For Citra:

You need a card, digital, a decrypted '.3DS' or a decrypted '.CIA' file of the game (follow this step if you want to dump your own game files, otherwise skip this step and use the files provided with the 'Gamefilepack' and 'exefs_exheader') to dump a cart use 'Uncart' which is lossless and more reliable ('Braindump' is lossy and might cause problems):

https://www.reddit.com/r/3dshacks/comments/40etaz/tutorial_dumping_3ds_carts_and_converting_3ds/

If you can't find a "decrypted" version of '.3DS' / '.CIA' first "decrypt(deep)" the file using 'Decrypt9WIP':

<https://github.com/d0k3/Decrypt9WIP/releases>

<https://gbatemp.Net/threads/download-decrypt9-open-source-decryption-tools-wip.388831/>

If you didn't dump the game download the '[NLP+].Gamefilepack.zip'(1.49GB):

https://mega.nz/#!54QhQYyQ!eOEeU9-c2rXvbflrxL978g92cXlbZrFKXR9CpeY_4IM

If you didn't dump the game download '[NLP+].exefs_exheader':

How to inject [NLPPATCH] files in 'ExtractedRomFS':
++++++

To extract and rebuild a '.3DS' file visit here:

<https://gbatemp.Net/threads/tutorial-how-to-decrypt-extract-rebuild-3ds-roms.383055/>

To extract and rebuild a '.CIA' file visit here:

<https://gbatemp.net/threads/tutorial-how-to-decrypt-extract-and-rebuild-a-cia.388677/>

If you Want to rebuild the '[NLP+].Gamefilepack.zip' files skip the 'extract' step.

After extracting replace the original with the [NLPPATCH] files in 'ExtractedRomFS' folders and rebuild file. Visit either of these threads and follow the 'Rebuilding for CFW / flashcards' or 'rebuild your ROM' instructions:

<https://gbatemp.Net/threads/tutorial-how-to-decrypt-extract-rebuild-3ds-roms.383055/>

<https://gbatemp.net/threads/tutorial-how-to-decrypt-extract-and-rebuild-a-cia.388677/>

To rebuild the "[NLP+].Gamefilepack.zip" load the 3DSBuilder tool:

<https://gbatemp.Net/threads/release-3ds-builder.388858/>

<https://github.com/sciresm/3ds-builder/releases>

Use the 'decrypteddexfs.bin' and 'decrypteddexheader.bin' files when they are requested. Remember to tick 'use pre-build dexfs' when adding the dexfs. Don't forget to add the '.3DS' extension when you name the file.

You'll now have a playable '.3DS' file that you can run with flashcards. You can also turn this '.3DS' in '.CIA' for CFW:

<https://gbatemp.Net/threads/release-3ds-simple-cia-converter.384559/>

(Based on the method you used you might need the xorpads for this action.)

For the resulting file to run (with Citra, etc) you need to also encrypt the resulting file with 'Decrypt9WIP':

<https://github.com/d0k3/Decrypt9WIP/releases>

<https://gbatemp.Net/threads/download-decrypt9-open-source-decryption-tools-wip.388831/>

---Kissing Guide---

Note: These tips were taken from the NLP forums, with some complimentary information.

➤ Initiation part

When the finger logo appears at the top of your screen it's your chance to initiate skinship. Try to patiently wait and poke her when the public eyes are shutting down to gain a good star that will result into a satisfactory filling of the big orange heart. Some locations are labeled as 'DATE SPOT' and the public eyes are less strict there.

スキンシップスタート！

There are three levels of strictness, RED/ORANGE/GREEN with RED eyes being the hardest stares to avoid and perform under. To fill the orange heart up the top you have to successfully collect at least 4/5 stars to go through to the next process otherwise you don't fill in the heart and don't move on.

Your girl's reaction to touching is also unpredictable so be carefully where you touch her cause you might make the girl embarrassed or anxious and she will cut the initiation short. Usually the forehead, hair, cheeks and neck are spots that she will appreciate your caress.

➤ Next step: Caressing

You no longer get a colored line residue this time to recognize if you are touching a hot spot or not but rather a colorless chain of sparkling stars. You now rather get an idea if you're touching a hotspot by the number of hearts that float off to the big heart collector.

- **Hot spot** = many big & normal sized hearts and also "+" hearts that give you extra time and extra points.
- **Cold spot** = few sporadic single tiny hearts that lead to blue "-" hearts if you continue stroking the cold spot.

Find a hot spot at the beginning and start with very small circle and medium to fast speed strokes, continue till the hot spot dries out or it's time to stop and then try to find a different spot. Once you notice a purple heart that comes out while you're stroking a hot spot it means that the spot will soon cool off and if you don't stop stroking in time might result into a sudden big blue "--" heart that will demolish what you collected. If you do stop in time, within a second or two after

the purple heart appears you win a "+TIME" heart. If you stop too soon you don't get the "+TIME" heart. A spot can give multiple hearts up to three times so be sure to test the same spot after a purple heart before moving to another postilion.

- **+TIME** = When gaining a +TIME heart you receive bonus time that is added to the ticking clock, during this free zone timeline you will be able to collect hearts without having to search for a hot spot or the hearts drying out.

ロマンチックタイム

Also, you can no longer collect up to 5 kisses in one go and without some effort because a clock is timing you and its barely enough time to collect one kiss. But you do however now win **+TIME** points if you perform the physical contact correctly so once so once you master the stroking technique, you'll be able to collect more time to gain more kisses and any portion you collect is saved for next time.

Your girl's reaction is now also very unpredictable and she also might initiate a recurrent kissing event herself even if you initially have only collected one kiss.

After the timer ends you will then be given two options, first option is to proceed to skinship, second option is to save the kiss you earned for later. You will be able to use the number of kisses you've earned the next time you decide to proceed to the kissing part.

[Warning]: You cannot collect kisses if you're in a special trip like the Enoshima trip.

➤ Final phase: Kissing

This part is now much closer to the techniques used in the first installment(s) of the game. You can recognize the type of kiss she wishes from you by the way the girl positions or tilts her head and her eye movements or shimmer.

キスタイル

head sideways	cheek
head sideways with hand on chin	ear
face looking straight eyes closed	one short peck to the lips
tilted head downwards with closed eyes	forehead
eyebrows arched no eye shimmering	chin to the sides
eyebrows arched with eyes shimmering	long kiss to the lips
no expression	do nothing till next face

To gain the perfect kiss wait for the special moment when she closes her eyes. Don't make her wait too long, though, else she will change position and the kiss will become orange and potentially ending a forever kiss session.

➤ Tips

You can get two kisses per session easily if you train yourself using the following technique:

- Do a zig-zag pattern (fast speed) on her face, this lets you find the hot spot easily. Now do a continuous, small circle (small to medium speed only) on that spot.
- As soon as a purple heart will flow to the left stop the motion immediately; this will end the flow of hearts with a big heart. Continue asap with the zig-zag motion and find the next hot spot.

Refrain kiss is when she asks for more kisses, usually from 5 to 4 to 3 kisses each time.

Forever kiss is as the name implies, you keep kissing her until you mess up. To get Forever kiss you need:

- Date spot with mood setting (A heart with the SPOT tag on, near the bottom of the second screen. You can also try when she invites you to her house.)
- More than 20 hearts used on the date (MAX HEART)
- She is in the best condition (blushing emoji face)
- Be in a Refrain kiss session
- Get red kisses (when your girl closes her eyes)

Remember! - Skinship and kisses increase your couple rank.

- Skinship, holding hands, Inviting her out ----- small effect.
- Kisses, her asking for skinship ----- medium effect.
- Refrain kiss ----- large effect.

The following table is the number of kisses required to unlock special outfits for your girl.

No. of kisses	Manaka	Rinko	Nene
10	Shrine Maiden	Shrine Maiden	Sweet-Loli

---ToDo's---

During the first part of the game, you have to court your chosen girl, and for that some events might pop once in a while; these vary from girl to girl, and you can do multiple tasks each day with some even varying. After you enter a relationship with your chosen girl, new events will be listed in the ToDo tab, which will give you objectives to find around the city. Remember these are time-limited events.

Remember to double tap the events to accept them.

These are the translated events, courtesy of Oli.

---Towano City Map---

Scattered around Towano City are many places where you can call your lover for a date, or just visit on your own to buy whatever items you come across. At high level spots, you won't have to worry about being seen and it will be easier to have skinship with your girlfriend. However, the spot level will decrease as time goes by, so please go out once in a while to maintain the level. (If the place's level is raised to 1 or more, the minimum level will be always 1.)

- School specific places to call your girlfriend are only available for weekday mornings, afternoons, and evenings (Saturday mornings only). You cannot take her on full dates there. Conversely, you cannot call out to shops and facilities in town on weekday mornings and afternoons (Saturdays only in the morning).
- ○ – Indicates it's a place available for dating.
- ✗ – Indicates it's a place not available for dating.
- * – Indicates the place gives you an item for repeated visits.

Kaisou mode = replay the pre-confession stage.

For personality change after the first part of the game is complicated, the best approach is to do it from the beginning, or use Kaisou mode. Follow these simple steps:

Prompts to trigger 3 choices during Pre-confession (1st part of the game)

- Intelligent and Strong
- Kind and Obedient
- Just like [Insert Girl's name]

is to greet them via

- Hey~/Oh/Hey
- Yah~/Nene-san/Takane
- The CHOP/Knee-Knock attack

136	Get all the events in Kaisou mode (all seasons)

Please note that a "short date" is considered using the "call out" button to take her to a restaurant or the school corridor.

---Side Notes---

- You can have other girls talk to you in various activities, or send you messages even though you are on a relationship with another girl. Mind you, those messages are on the friendly side, so no cheating. To do so:
 - Initiate Kaisou Mode and aim for the girl you want and in the confession day she will stop your dream and chastise you about having a girlfriend already.
 - After that, select an activity on your schedule to meet with the girl (for Makana chose tennis activities, for Rinko chose the library duties, and for Nene chose Dixie's). If you managed to meet with her, from that point, she will send you messages occasionally and even appearing on random events.
- For some of the items to be available, you have to level the place you're visiting, minimum to level 2. For example, the Video Rental Store and the CD Shop will have DVD's available when you level the respective location to level 2. Some stores have some products available depending on the season. Plan accordingly to buy what you want.

---Disclaimer---

1.) Be Understanding/Thankful

We are SOME DUDES (there may be girls, we don't know) translating FOR FREE. We don't have a team. We don't have a Patreon. This took time of our lives, which we gladly invested into this passion project. Please take it easy with the criticism and be grateful for the translation. I hate entitled internet snobs.

We did this because we love NLP+ and we wanted y'all to enjoy it too. :D

2.) Support the Game!

I adore the dev/this game. The original translation team ran into some problems with the tools and the injection engine, so they put it in pause. We can't guarantee the same level of quality of the first LP patch back in the NDS, but we can bring you an enjoyable experience with a language you might be familiar with.

Therefore, please consider buying the game, rather than pirating (I know you won't, but it'd be swell of you).

3.) Translator Freedom/Limitations

There were over 100,000 lines to translate. To make matters worse, there's a lot of random slang or programmatic language, and tons of dialogue choices and reused dialogue which can get really sloppy. Therefore, we played the game over and over, checking for context and ensuring our use of the language was correct (sorry guys, we can't make the same context in English like in the original Japanese one, but we think we did a pretty decent job in that regard).

So, enough discourses... Enjoy.

.cia and .3ds are formats used by the CFW to run games. Think of them like ISO's. Of course, we don't encourage anyone to pirate stuff, these are just for clarification.
